Revision history 18

A. Background

LC practice: As stated in H 1075, LC catalogers will no longer use form subdivisions. Instead assign an appropriate term or terms from Library of Congress Genre/Form Terms (LCGFT), e.g. ***Textbooks***. To replace a form subdivision that includes a demographic group, also assign Library of Congress Demographic Groups Terms (LCDGT) to bring out the audience of the resource being cataloged, e.g. ***German speakers*** or ***Arabic, Students of***.

B. Recent revisions

2026-01: Added instructions related to LCGFT implementation.

C. Types of headings covered

The subdivisions listed in sec. E and sec. F, below, may be used on a free-floating basis, as appropriate, under subject headings for classes of persons, including age and sex groups; social, economic, and political categories of persons; types of afflicted persons; members of religions; employees and occupational groups; etc.

Examples:

Youth

Women

Fathers

Poor

Political prisoners

People with mental disabilities

Liver--Cancer--Patients

Hare Krishnas

Judges

Darts players

High technology industries--Employees

The category includes headings for classes of persons that are formulated with subdivisions used under names of places or individual corporate bodies.

Examples:

Great Britain--Officials and employees

Stanford University--Faculty

United States. Navy--Officers

Headings for classes of persons qualified by ethnic or national adjectival qualifiers are also included in this category.

Examples:

African American dentists

French students

Foreign workers, Turkish

Subdivisions from this list may be used under headings for groups of literary authors where there is no conflict with a subdivision specifically designated for use under literary authors in H 1155.2.

D. Types of headings not covered

This instruction sheet does not apply to headings for social classes or collective social groupings.

Examples of excluded headings:

Nobility

Working class

Families

Clans

The instruction sheet also does not apply to headings for ethnic groups and nationalities.

Examples of excluded headings:

Hispanic Americans

```
Māori (New Zealand people)
French
```

For subdivisions used under ethnic groups and nationalities, see H 1103.

This instruction sheet also does not apply to headings for members of religious and monastic orders. For subdivisions used under names of individual religious and monastic orders, see H 1186.

E. Conflicts

Determine if the use of a free-floating subdivision from this list conflicts with a previously established subject heading. In the event of a conflict between an established subject heading and a subdivision on this list, use the established heading unless a decision has been made to update or change all headings of that type. For example, use the established subject heading *__Child abuse__* rather than formulate a heading of the type *Children--Abuse of*. However, previously established headings of the type *Teachers, Training of* were changed to the form *__Teachers--Training of__*.
